Thank you to Celebrate Catering for providing our weekly meals. Please contact Stacy to cater your event. Call 712-322-2580 or visit www.celebratecatering4u.com.

February 4 Program

Stacy Schultz - Hospice of Southwest Iowa Iowa Physician Order for Scope of Treatment (IPOST)

The Iowa Physician Order for Scope of Treatment (IPOST) is a new process for documenting treatment preferences. It is a 1-page, 2-sided document based on a national movement that consolidates and summarizes patient preferences for key life-sustaining treatments including: CPR, general scope of treatment, antibiotics, artificial nutrition & hydration. Persons may refuse treatment, request full treatment, or specify limitations.

The standardized order form can be easily and quickly understood by patients, healthcare providers, and emergency personnel. It is meant to complement advance directives by translating patient wishes into actionable medical orders.

It is primarily intended to be used by the chronically, seriously ill person in frequent contact with healthcare providers, a person with a life-limiting illness, or the frail and elderly already residing in a nursing facility.

The IPOST is completed by the patient or authorized agent in conversation with a person with sufficient knowledge or training to be able to explain the procedural and medical implications of the various treatment choices, and then signed by the patient/agent and a physician, advanced registered nurse practitioner, or physician's assistant.

The physician/Advanced Registered Nurse Practitioner/Physician's Assistant signature translates patient preferences into physician's orders actionable across the healthcare continuum.

The IPOST "travels" with the patient and is honored in any setting: hospital, clinic, long-term care facility, assisted living residence, hospice, or at home. The original is brightly colored for easy identification, but photocopies, faxes, and electronic scans are also valid.

The portability of the form allows seamless documentation of treatment preferences and closes gaps as patients transfer from setting to setting or experience delays in access to providers.

The IPOST form is attached.
