June 18 Program

Paul Ross, Director

Transportation Security Administration - Nebraska

Mission - Protect the Nation's transportation systems to ensure freedom of movement for people and commerce.

Vision - Provide the most effective transportation security in the most efficient way as a high performing counterterrorism organization.

Core Values - Integrity. Innovation. Team spirit.

History - On the morning of September 11, 2001, nearly three-thousand people were killed in a series of coordinated terrorist attacks in New York, Pennsylvania and Virginia. The attacks left a profound effect upon our country and set in motion a chain of events that resulted in the creation of a new federal agency designed to prevent similar attacks in the future. Driven by a desire to help our nation, tens of thousands of people joined this new agency and committed themselves to strengthening our transportation systems while ensuring the freedom of movement for people and commerce.

The [Aviation and Transportation Security Act](#), passed by the 107th Congress and signed on November 19, 2001, established TSA and required the completion of more than 30 mandates by the end of 2002. In the largest civilian undertaking in the history of the United States, TSA met each one of these initial requirements including:

- Assuming responsibility for all civil aviation security functions from the Federal Aviation Administration.
- Hiring, training and deploying security officers for over 400 commercial airports Guam-Alaska in 12 months.
- Providing 100 percent screening of all checked baggage for explosives by December 31, 2002.

In March 2003, TSA transferred from the Department of Transportation to the Department of Homeland Security which was created on November 25, 2002 by the [Homeland Security Act of 2002](#) unifying the nation's response to threats to the homeland.

Layers of Security

Intelligence
Customs and Border Protection
Joint Terrorism Task Force
No-Fly List and Passenger Pre-Screening
Crew Vetting
VIPR (Visible Intermodal Prevention and Response) Teams
Canines
Behavior Detection Officers
Travel Document Checker
Checkpoint/Transportation Security Officers
Checked Baggage
Transportation Security Inspectors
Random Employee Screening
Transportation Security Specialists - Explosives
Federal Air Marshal Service
Federal Flight Deck Officers
Trained Flight Crew
Law Enforcement Officers
Hardened Cockpit Door
Passengers

Technology - TSA identifies emerging technologies in order to stay ahead of evolving threats. TSA uses state-of-the art technologies to effectively screen passengers, checked baggage and air cargo.

TSA conducts careful analysis of intelligence to determine where best to deploy our technology resources at airports, subways, ports and rail. TSA uses a number of sophisticated technologies to provide security for the nation's transportation systems including:

- [Credential Authentication Technology](#)
- [Paperless Boarding Pass](#)
- [Biometrics](#)
- [Bottled Liquids Scanners](#)
- [Explosives Detection System](#)
- [Explosives Trace Detection](#)
- [Threat Image Projection](#)
- [Imaging Technology](#)
